Gift Suggestions

OUR BOOK affords a wide selection of GIFTS at prices—from $1.00 up—and is a very convenient and helpful reference on *all occasions*—Christmas, Weddings, Birthdays, Memoriams, etc.

EVERY ARTICLE shown has been selected with our most expert care and judgment, and is exceptional value at the price quoted.

WE PURCHASE only from Manufacturers and Importers whose reputation is thoroughly established, so we are fully insured that our goods *must* be exactly as we represent them. Therefore, any imperfection that might develop in Jewelry bought of us is immediately made good.

WE OPERATE our business and stake our growth and success on the theory that a store which is to be truly successful must do more than merely sell to you and collect the money. IT MUST PLEASE AND SATISFY YOU.

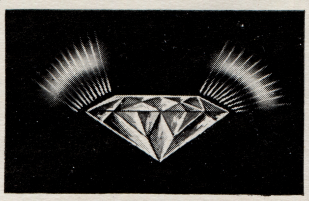

SPACE DOES NOT PERMIT us to illustrate our complete stock but, as you know, we carry everything found in an up-to-date Jewelry Store, including the newest ideas of the season.

ENGRAVING OF ALL KINDS, and special designing skilfully and beautifully executed. We suggest making your selection EARLY of articles to be engraved. Those who wait 'till late, are sometimes disappointed on engraving.

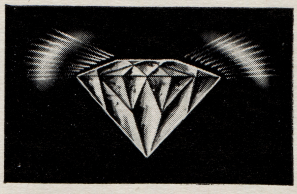

MAIL ORDERS. Your orders sent us by mail will receive immediate and expert attention. Write your name *in full* and plainly, with complete address.

Please do not cut or mutilate this catalog—simply order by number.

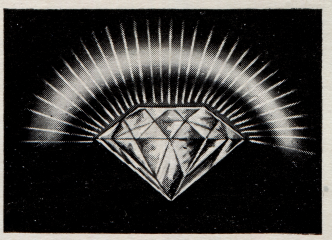

A Brief Study in Diamonds

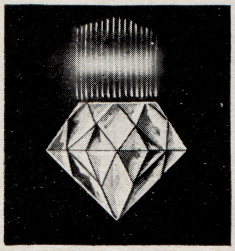

TOO SHALLOW
No brilliancy when viewed from top

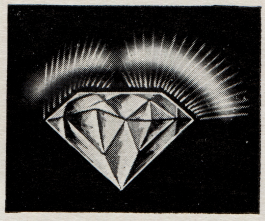

TOO THIN ABOVE GIRDLE
TOO DEEP BELOW
No brilliancy from top—too much weight for diameter

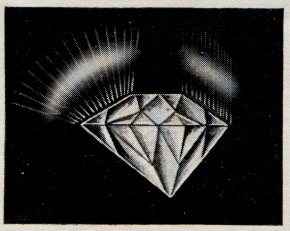

PERFECT PROPORTIONS
Equal radiations from all angles

TOO HIGH ABOVE GIRDLE
No brilliancy from sides

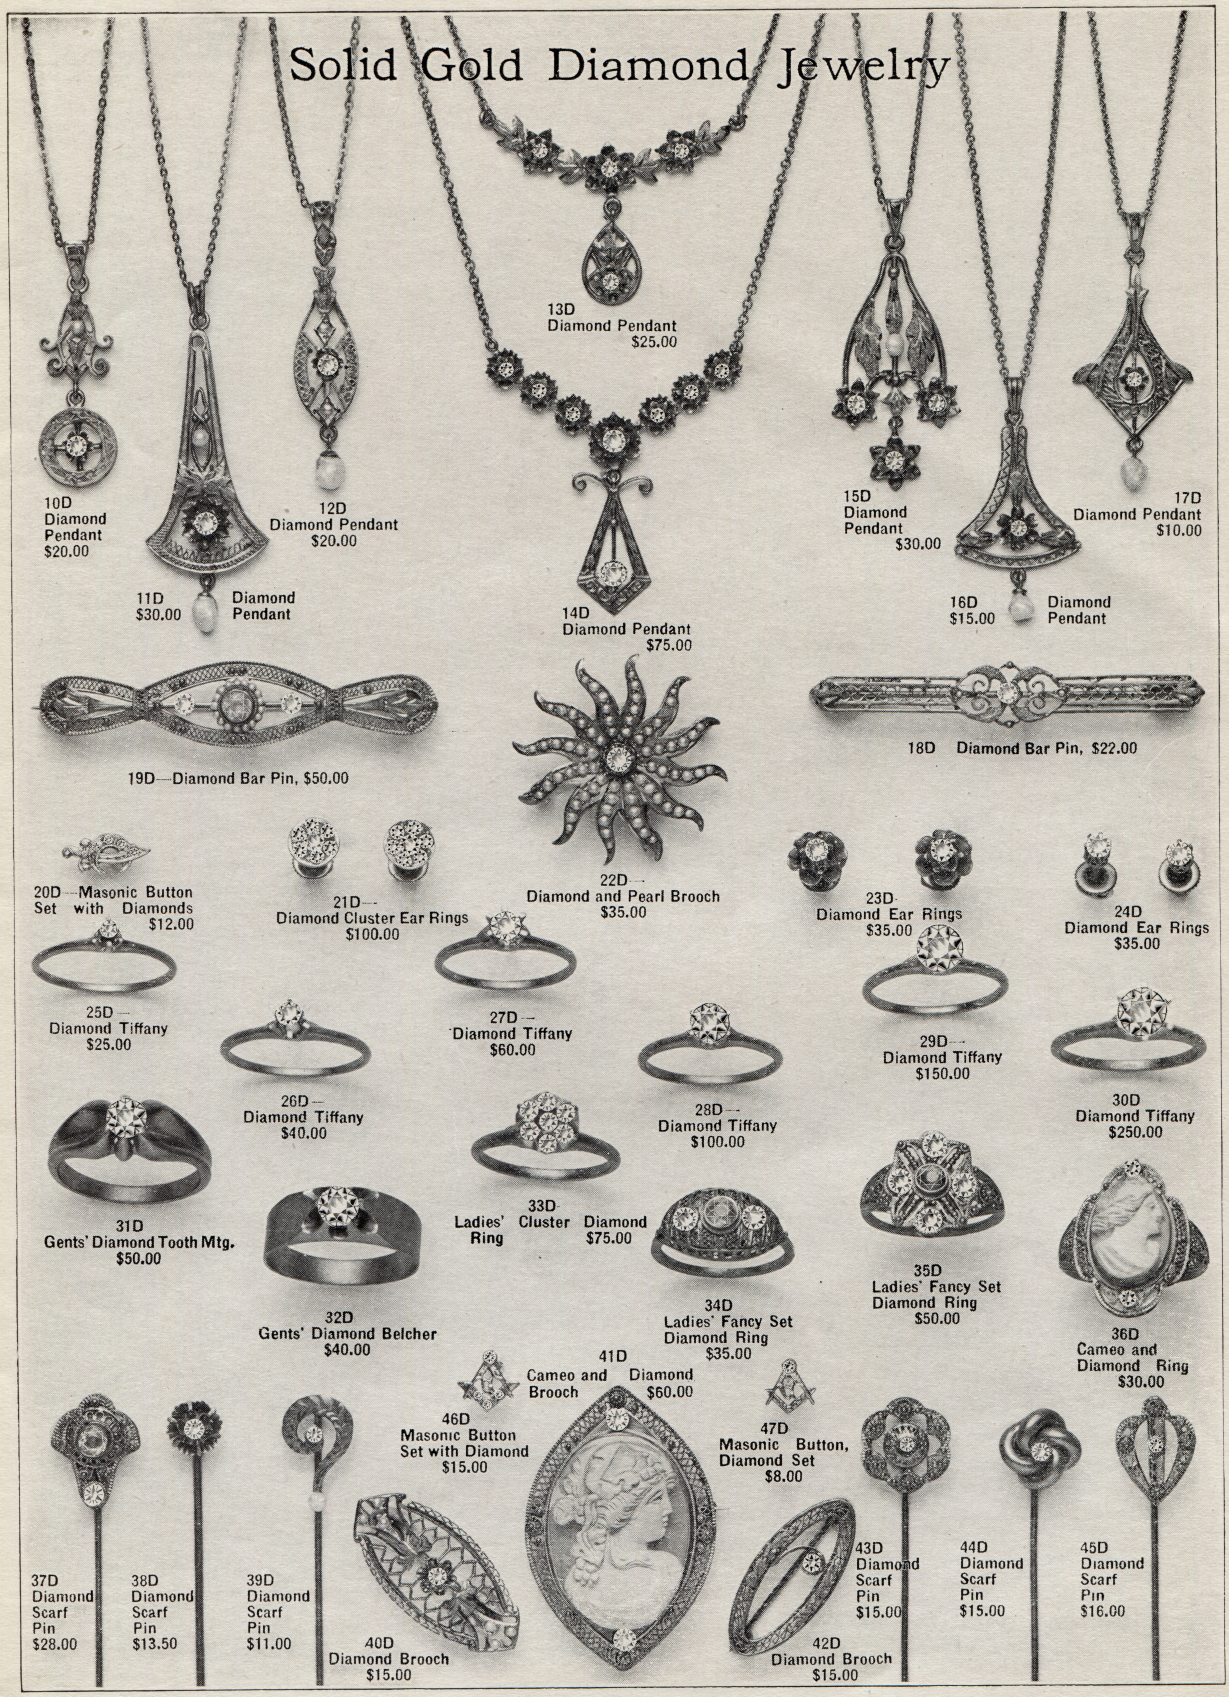

IRREGULAR GIRDLE
Stone will be brilliant from some angles—dull at others

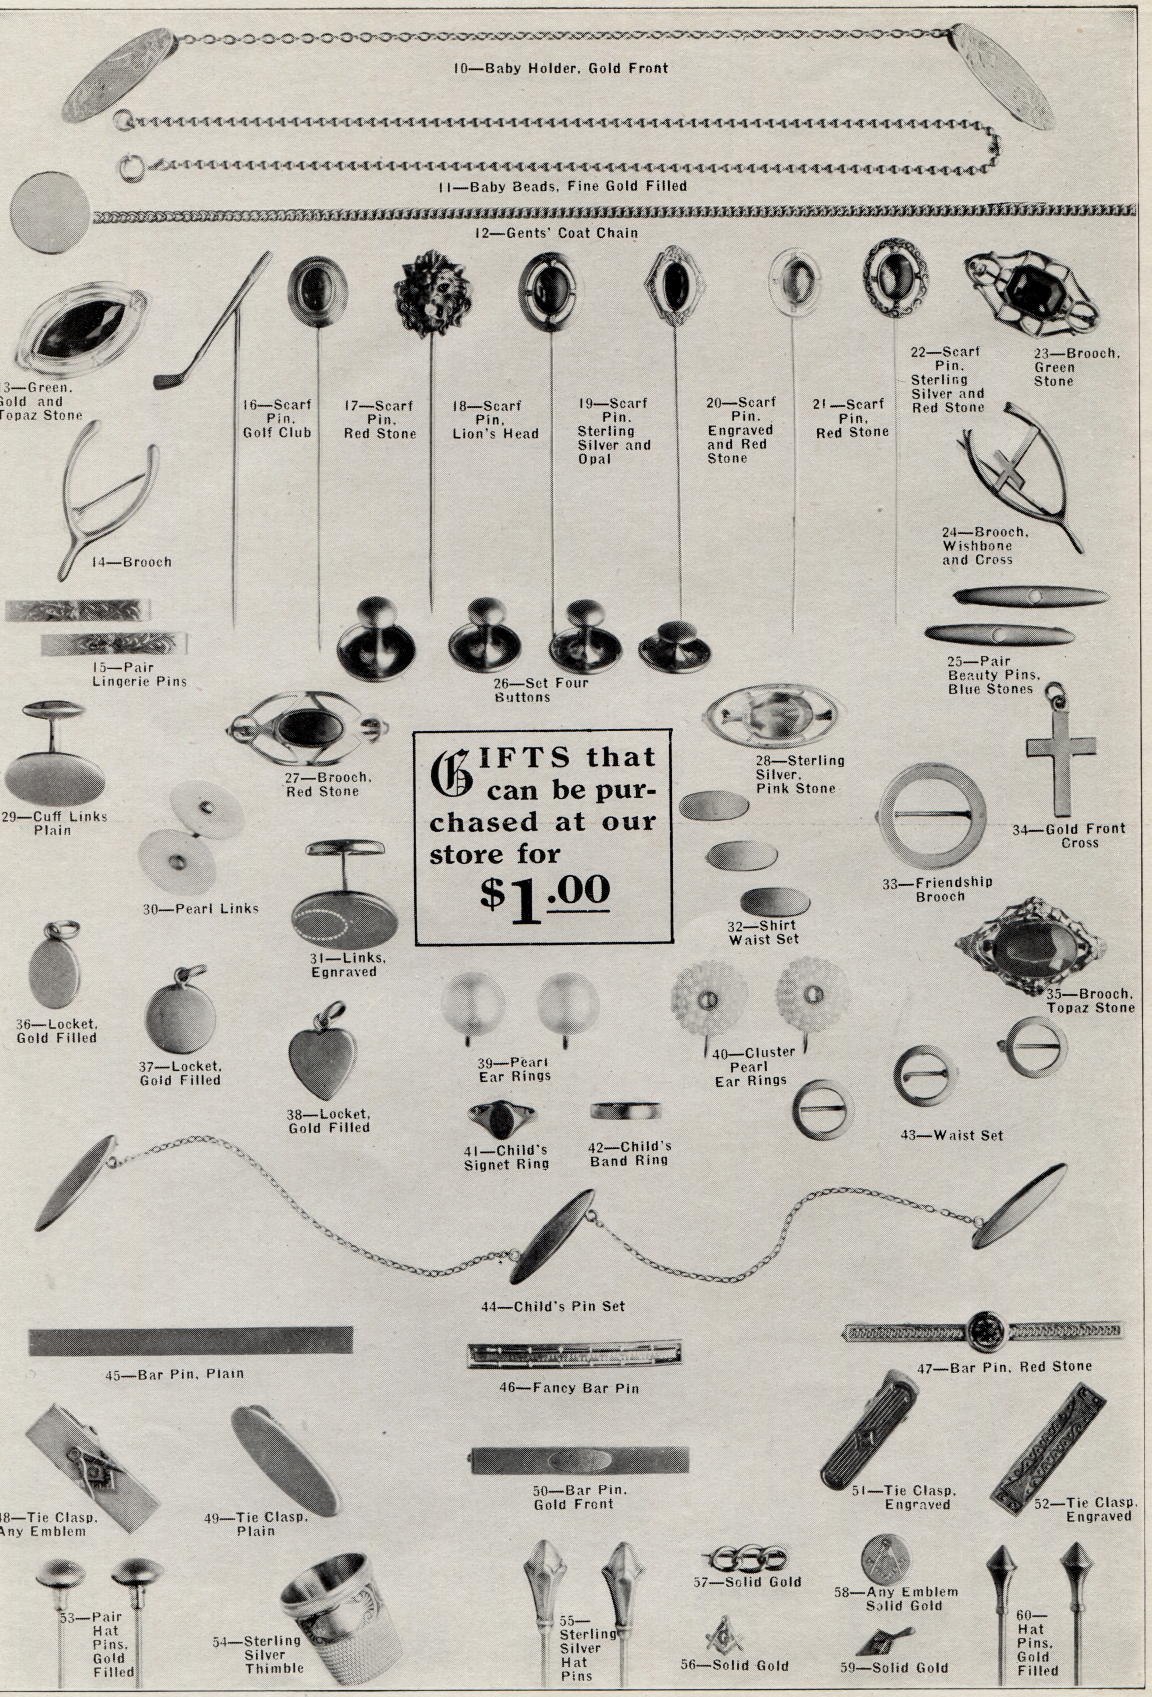

UNBALANCED
A common imperfection
Brilliant at some angles and not at others

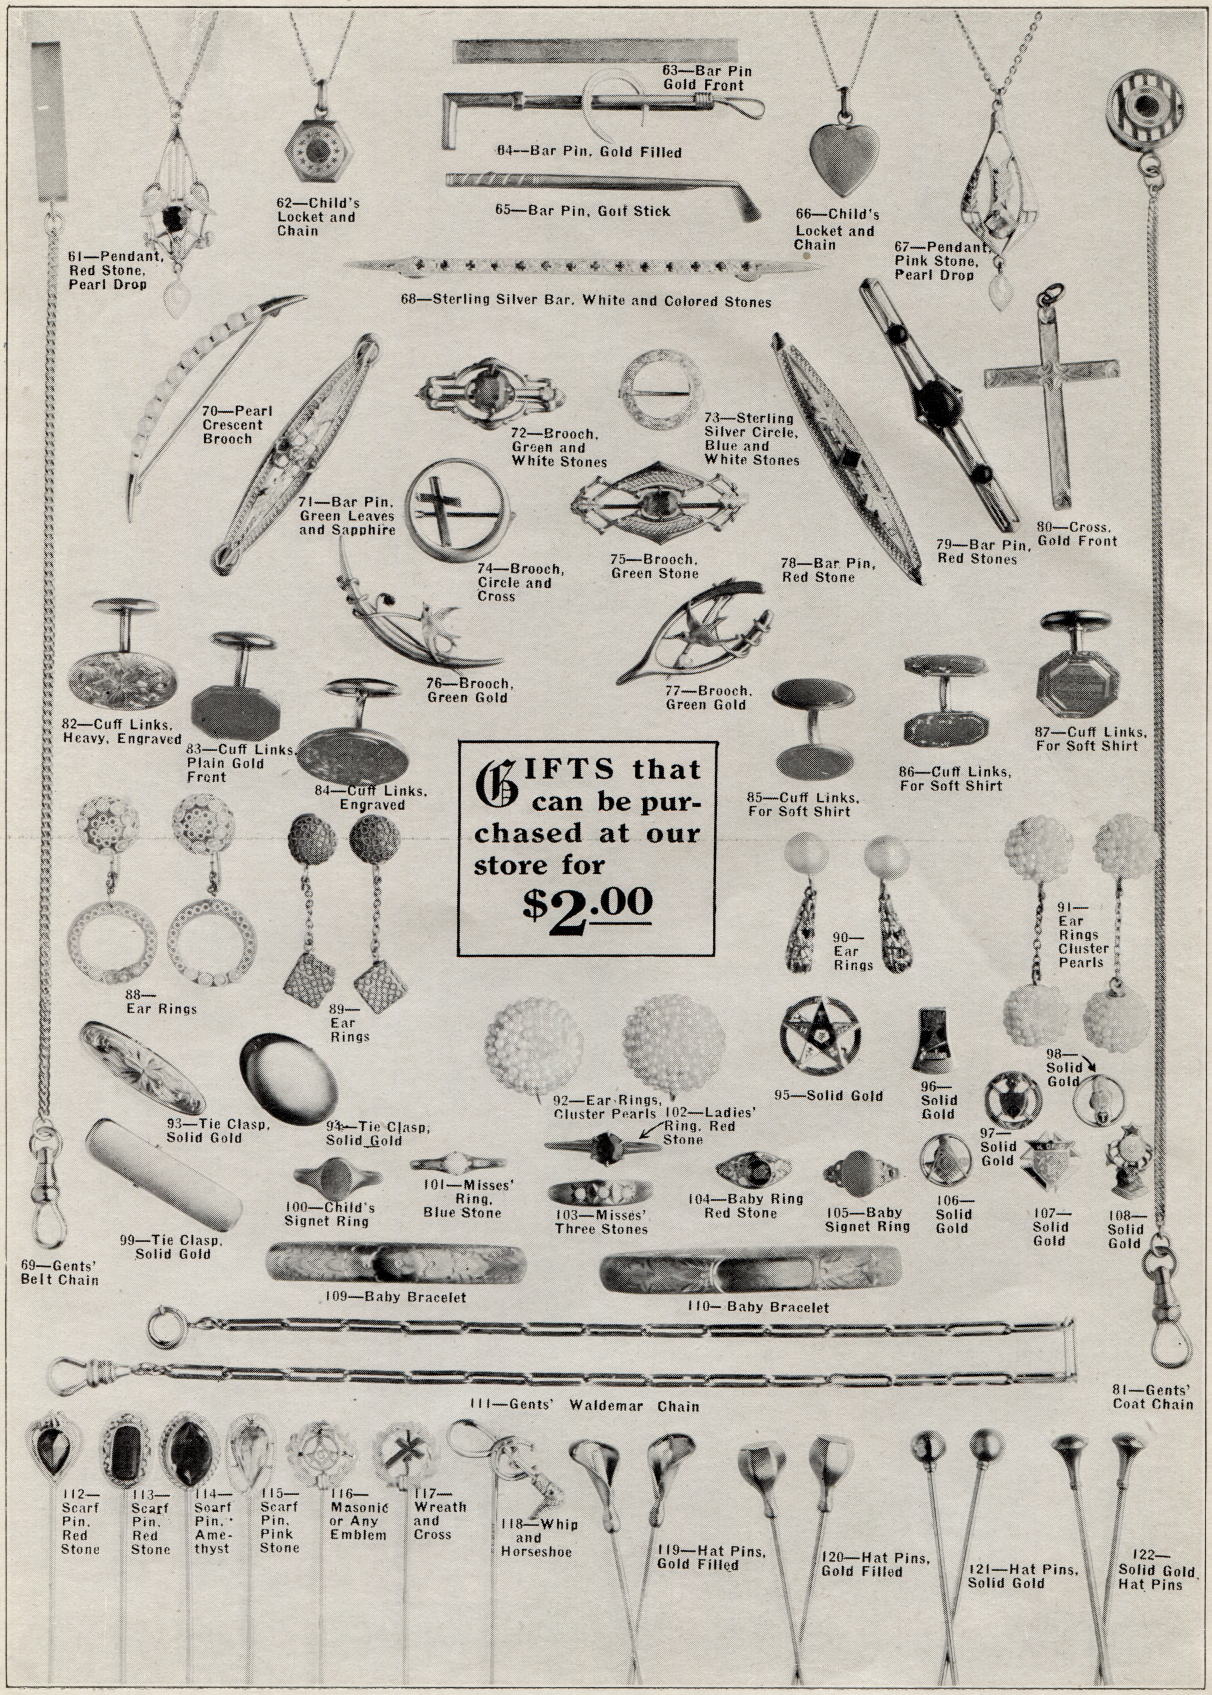

Diamonds are the most valuable and desirable of jewels because of their *brilliance*. The brilliancy of a stone is therefore of ***first*** importance. A diamond may contain a small flaw, such as "carbon," "feather," a bubble, a crack or a scratch, and still be more brilliant, if perfectly proportioned, than another stone that is free from flaws. A perfectly cut diamond must be perfectly round—the portion above the girdle one-third and below the girdle two-thirds of the total depth—it should have fifty-eight facets well polished and free from surface scratches—the girdle must be smooth and well finished.
